# How To Make A Config For Sentry MBA

By Cloud from fkn0wned.net

Welcome into my guide about how to make a config for sentry mba. I will teach you how to do everything in an easy step by step guide. We will see how to make a simple config, and how to make a config which capture the datas on a page, for example the number of games.

This guide has been written by Cl0ud from fkn0wned.net.

You can't resell this guide without my authorization; doing so will result into a scam report.

A scam report will be open too if you leak this ebook, or if you dispute the purchase of this ebook.

The first step is to open sentry mba :

Start OAbort	Site:	· · · · · · · · · · · · · · · · · · ·
	Progress: 0%	List:
Settings General HTTP Header Proxy Settings Fake Settings Keywords	Site Settings         Timeout (s): 20       Bot relaunch delay (s): 0       Resolve Hostname         Combo Settings <user>:<pass> filter: Apply same rules for <user> and <pass> *         Minimum Length: 8       Maximum Length: 8         Letters       Digits       Allohanumeric         Forbidden Chars:       Allowed Chars:         Lowercase and Uppercase       Letter and Digit         Special Character         <email> filter: Must Be Email</email></pass></user></pass></user>	General Settings         Image: Save automatically valid usernames and expired combos         Image: Save automatically "To Check" combos         <

You then go on the login page the site of your choice. I will take battlefield heroes as example

We then take the url of the login page and we paste it on the first textbox. After that we click on HTTP Header, we tck MW as request mode, and click on the wizard thingy.

We then load a combolist and click on Start !

On the second part of this Guide, we will see how to add a capture feature to our config.

Now we will see how to make a config which capture data from the page. I will take a playstation config as exemple.

We will go back here:

					[#] MASTER Wiz	ard [#]

	Parsing Code Output:	
		Codes 421: 0

Now click on "update", then on "test updated parsing" code, and finally on the "update" button at the bottom of the form.

That's done, you made your own config with capture features!

Thank you for buying and reading this ebook  $\textcircled{\odot}$
